Diamon-Fusion Products

To Whom It May Concern:

In a market place of so many fantastic promises & technological developments, it is hard to see a clear path often and or not be consumed by "smoke & mirrors" as the old saying goes.

When I purchased my new Saab in November 2008 I was asked to purchase the Diamon product for my windshield.

I was admittedly not without some skepticism!

Calgary is not known for having many clear un cracked wind shields out side of the showroom.

With hesitation I preceded in the trial, some things as they say are too good to be true, but it stops here!

This product is everything is claims to be and then some.

I am amazed at the abuse my wind shield has survived seemingly unscathed after over a year. I wish I had known sooner about this product for my other cars and the 3 wind shields I purchased in 3 years.

I completely endorse this product willingly & knowingly, I am driving the proof. The customer service associated with this product has been exemplary; I suspect it comes from so many satisfied clients.

Cheers again & thank you.
